# REQUEST FOR PROPOSAL

# Health Insurance Claims & Care Management Modernization

**RFP Reference:** INS-HEALTH-2026-004
**Target Organization:** Not specified — reusable insurance testing RFP
**Issue Date:** September 2026

**Notice:** Fictional, prospect-neutral testing document. Not an actual procurement.

## 1. RFP Overview

• A multi-line insurance organization seeks technology providers for health insurance claims & care management modernization.

## 2. Business Objectives

• Improve health claims adjudication efficiency and accuracy.

• Support member/provider digital interactions.

• Enable utilization, care and claims analytics.

• Reduce leakage and administrative effort.

## 3. Scope of Work

• Digital health claims intake and document processing.

• Claims validation, adjudication rules and exception management.

• Provider and member portals.

• Fraud, waste and abuse analytics.

• Utilization and care-management workflows.

• Policy, provider, payment, CRM and data integration.

• Operational, financial and care analytics.

## 4. Functional & Technical Requirements

• Support configurable business rules, workflows and approval thresholds.

• Provide explainable AI/analytics recommendations where applicable, with human oversight.

• Maintain audit trails for source data, recommendations, actions and decisions.

• Provide API-based integration with relevant enterprise systems.

• Support scalable cloud, hybrid or on-premises deployment options.

## 5. Security, Privacy & Governance

• Role-based access control, encryption and comprehensive audit logging.

• Data retention, deletion, masking and access controls.

• Support applicable insurance, privacy, cybersecurity and AI/model-governance requirements.

• Business continuity and disaster recovery.

## 6. Implementation Requirements

• Discovery and current-state assessment.

• Target architecture and integration design.

• Configuration, customization and migration where required.

• System integration and user acceptance testing.

• Pilot followed by controlled production rollout.

• Training, knowledge transfer and post-go-live support.

## 7. Vendor Qualifications

• Demonstrated insurance technology experience.

• Relevant domain and enterprise implementation experience.

• Relevant AI, analytics or digital transformation experience where applicable.

• Enterprise integration capability.

• Documented security and governance practices.

• Comparable client references preferred.

## 8. Proposal Response Requirements

• Executive summary and company profile.

• Understanding of requirements and proposed solution.

• Solution architecture and integration approach.

• Functional requirement response matrix.

• Security, privacy and governance response.

• Implementation plan, support model, references and commercial proposal.

• Assumptions, risks, exclusions and dependencies.

## 9. Evaluation Criteria

| Evaluation Area | Weight |
|---|---|
| Health insurance fit | 15% |
| Claims/adjudication | 20% |
| Fraud/analytics | 15% |
| Digital member/provider experience | 15% |
| Data/integration | 15% |
| Security/privacy | 10% |
| Implementation | 5% |
| Commercial value | 5% |

## 10. Indicative Timeline

• RFP publication — Week 0.

• Clarification period — Weeks 1–2.

• Proposal submission — Week 4.

• Evaluation and shortlist — Weeks 5–7.

• Solution demonstrations — Weeks 7–8.

• Commercial discussions — Weeks 9–10.

• Target implementation start — Week 12.

## 11. Commercial Response

• Implementation/professional services fees.

• Platform/license/subscription fees.

• AI/model and third-party data costs.

• Integration/customization costs.

• Training and change management.

• Annual support and maintenance.

• Optional modules.

## 12. Proposal-Analysis Usage Note

This fictional RFP is designed for proposal-based prospect analysis. The analysis system should extract requirements, objectives, evaluation criteria, weights, timeline and commercial considerations from the RFP, then independently research the selected prospect. Prospect-specific facts must not be inferred from the RFP. Distinguish verified facts, reasonable inferences, hypotheses and unknowns.

## 13. Disclaimer

Fictional reusable testing artifact. Not an actual procurement document issued by an insurer or other real organization.
